CELEBRITI CS

Rapeseed

Varietal profile

Type: "00" restored hybrid

Earliness: medium-early maturing

Registration: UE 2019

Height: tall (159 cm)

TKW: high (4,4 g)

Oil: Medium to high (44.9% to 46.4%)

The essential

Medium-early maturing rapeseed

- CELEBRITI CS is medium-early maturing and has a good TKW.
- It is medium-late flowering, with fast silique and seed dry-down at end of cycle.

Rapeseed with VLS to phoma

- CELEBRITI CS offers two types of resistance: very high specific and quantitative.
- 2018 G2 score: 0.99

Agronomic and health profile

Good oil content and good yields

- Medium to high oil content, regular over the entire region ($\geq 45\%$).

Multi-year France results

Recommendations

Cultivation areas

- Recommended sowing dates:

Cultivation tips

- Sowing early ensures crop implantation and results in increased yields.
- Option to sow under frost-sensitive cover.
- Harvest at the right stage of maturity.

Density tips

- Deep soils: 30 seeds/m²
- Average soils: 35 seeds/m²
- Shallow soils: 40 seeds/m²
