# QUANTI KO CS

Rapeseed

## Varietal profile

Type: 00 winter rapeseed

Earliness: early

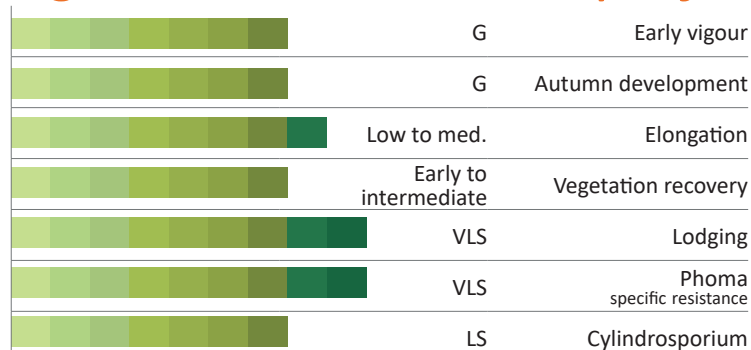

Registration: Hungary

Height: medium to tall (164 cm)

TKW: medium to low (3.8 g)

Oil: high (46.12%)

## Agronomic and health profile

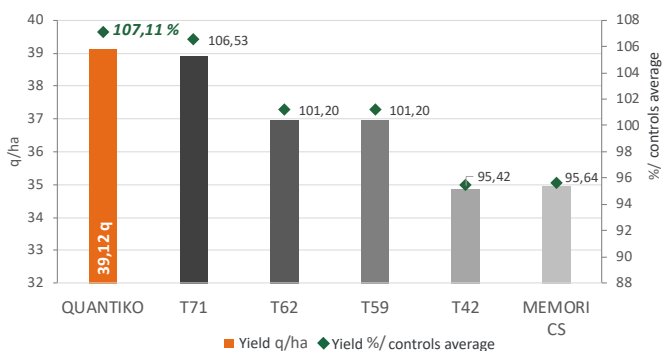

## The essential

### Early rapeseed

- QUANTI KO CS is early-flowering and early-maturing.

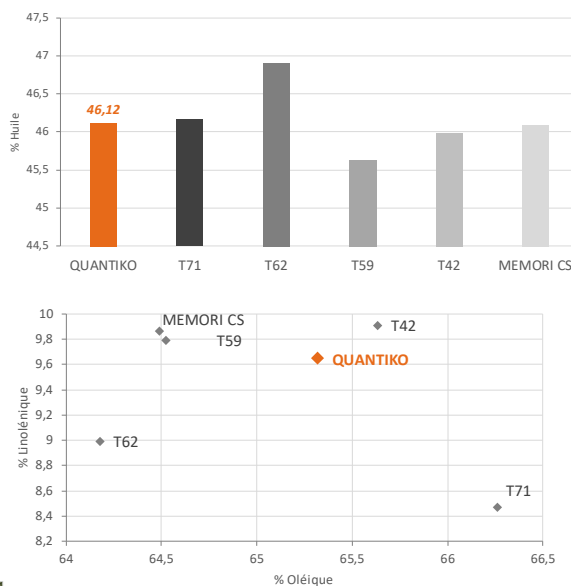

### Strong yield potential in cold areas

Test sites in cold areas of France: Réclainville (28), Vitry-la-Ville (51), Pichamps (21), Riaville (55), Selommes (41)

### High oil content

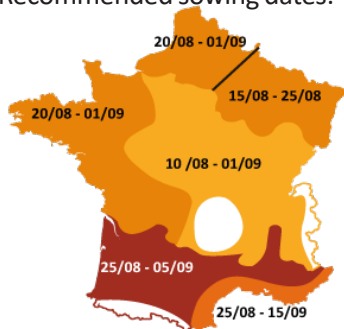

- Good oil content
- Good omega-3 content
- Medium glucosinolate content

## Recommendations

### Cultivation areas

- Recommended sowing dates:

### Density tips

- 30 to 35 seeds/m<sup>2</sup>

### Cultivation tips

- All soil types and all continental areas

### Expert Opinion

“ QUANTI KO CS is an early-flowering and early-maturing variety with medium plant size, and offers early recovery at the end of winter.

QUANTI KO CS is very healthy, with dual phoma resistance.

Its very high yield potential is achieved with a large number of very full siliques and medium TKW.

QUANTI KO CS has good oil content and low glucosinolate content.
